PROFESSIONAL SUMMARY

Motivated and detail-oriented **MERN Stack Developer** and **BS Computer Science** student (6th semester) with hands-on experience building production-grade, scalable web applications using React, Node.js, and MongoDB. Proficient in developing Progressive Web Apps (PWAs), real-time systems, and responsive user interfaces. Passionate about clean code architecture, performance optimization, and delivering user-centric solutions. Seeking a software development role to leverage full-stack expertise and contribute to impactful projects.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C#, SQL

Frontend Development: React 19, Next.js, Tailwind CSS 4, Framer Motion, HTML5, CSS3, PWA

Backend Development: Node.js, Express.js, REST APIs, MongoDB, Mongoose

Mobile Development: React Native, Expo

Tools and Platforms: Git, GitHub, Vercel, Docker, Cloudinary, VS Code, Postman

Concepts: Data Structures, Algorithms, OOP, Database Management, Software Engineering, Agile/Scrum

KEY PROJECTS

EventPulse - Commercial Grade PWA

MongoDB, Express.js, React, Node.js (MERN), Cloudinary, Docker

Developed a full-stack Progressive Web Application for event ticketing with enterprise-grade analytics, real-time features, and a visual admin dashboard

Implemented infinite scroll pagination with server-side filtering, sorting, and MongoDB aggregation pipelines for high-performance data retrieval

Built a rule-based AI chatbot running locally on the server to automate customer support, FAQs, and onboarding with zero API costs

Integrated Cloudinary CDN for optimized image storage and Dockerized deployment on Vercel (frontend) and Render (backend) with CI/CD

Personal Portfolio Website

React 19, Tailwind CSS 4, Framer Motion 12, Vite 8, PWA

Designed and built a premium interactive single-page portfolio with custom animations, AI chatbot, command palette, and achievement system

Implemented PWA support for offline access, installable on desktop and mobile devices with native-like performance

React Native Todo App

React Native, Expo, TypeScript, Drawer Navigation

Built a modern cross-platform mobile todo application featuring drawer navigation, modular architecture, filter functionality, and clean UI

Hybrid OS Scheduler Pro

Python, Operating Systems Concepts

Developed a CPU scheduling simulator implementing FCFS, SJF, Round Robin, and Priority Scheduling with comparative performance analysis

EDUCATION

Bachelor of Science in Computer Science

Air University, Rawalpindi | Sep 2023 - Jun 2027 (Expected)

Credit Hours: 100 (82 completed + 18 in progress) | Relevant Coursework: Data Structures, Algorithms, OOP, Database Systems, Software Engineering, Web Development, Operating Systems, Computer Networks

LANGUAGES

English: Professional Working Proficiency | **Urdu:** Native | **Punjabi:** Native
